**We provide engineering solutions to
Assets Integrity Management
& Life Management Support**

PROFILE

Our Policy

Oceanics believe in operational excellence in our products and quality services. We always strive to satisfy our client's expectations promptly with the right products and solutions by adopting continual improvement and innovations at a competitive price.

Our Mission

Our mission is to provide excellent services to our customers through the integration of motivated people, quality solutions and innovative technology in a cost-effective manner with the highest regard to safety and the environment.

Environment, Health & Safety

Oceanics takes pride in our commitment to Environment, Health and Safety. In addition to that, we adhere to the compliance standards and regulations. Oceanics strived to protect the client's valuable assets, reduce downtime and equipment failure, enhance productivity and maximize profitability.

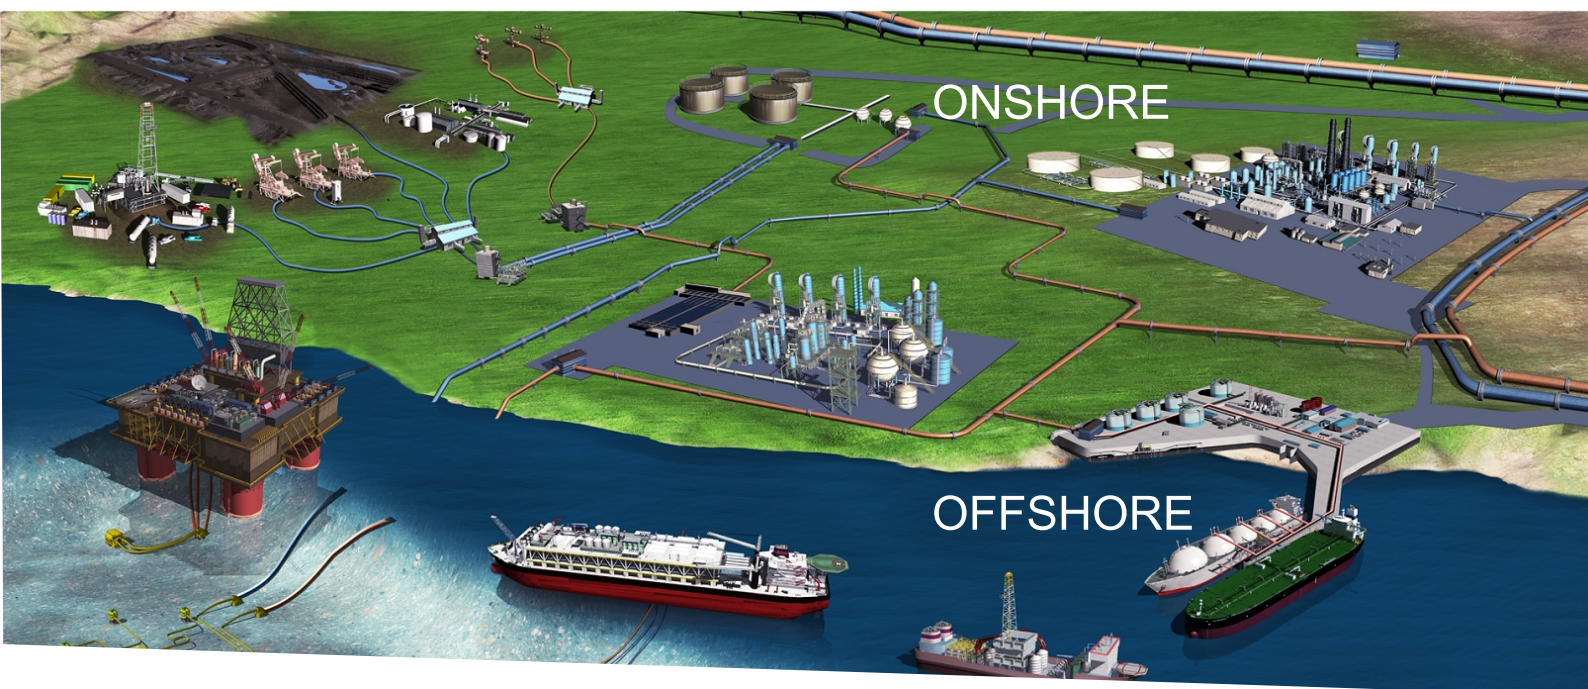

Core Values

A core part of any organization are their core values. The core values at Oceanics goal to share our beliefs, our personality, our story and serve as internal ways to guide our actions and behaviors.

Purpose: To enhance our success through outstanding performance by every client every time.

VALUES IN ACTION

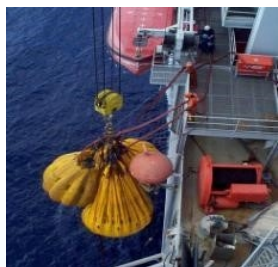

CORE SERVICES

Deep Water Facilities

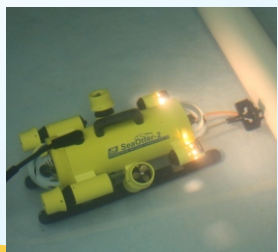

- Floating units (FPSO, Semi-Sub) and TLP/SPAR
- Offloading facilities including export lines and buoys
- Mooring systems
- Rigid or flexible flow lines, risers and towers
- Pipelines and subsea equipment

Offshore Facilities

- Fixed offshore platforms and floating units
- Rigid or flexible risers and flowlines
- Pipelines and subsea systems
- Concrete gravity base structures
- Offshore LNG plants, export, or receiving terminals

Load Test on Crane

Mini ROV with UT Gauging

Preservation of Top Drive

Technical Services and Expertise

Technical Services and Expertise

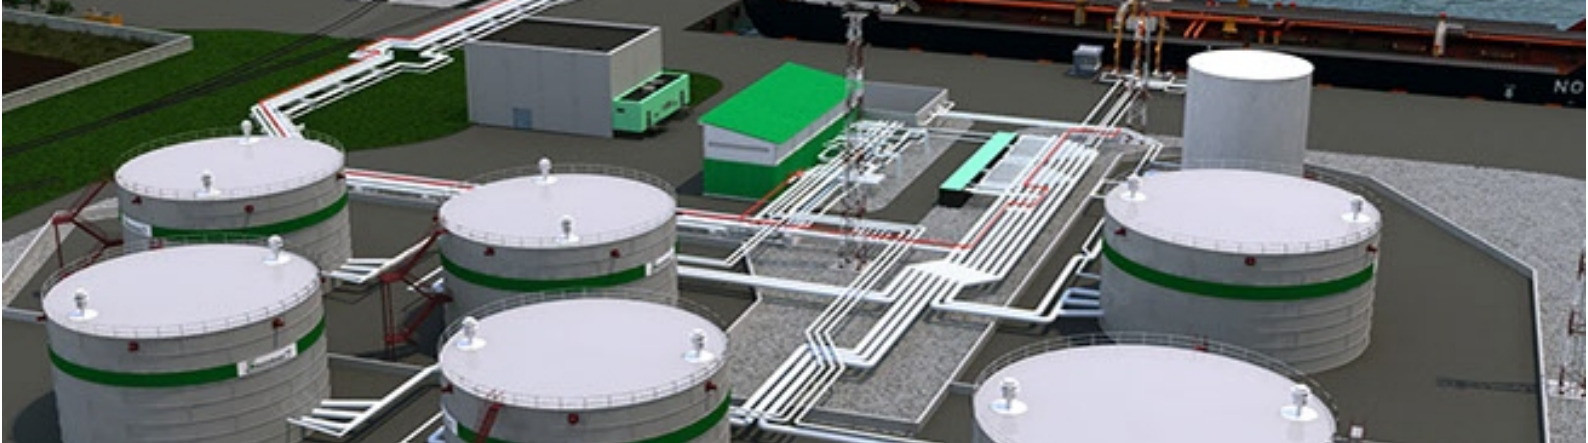

- Corrosion Assessment
- Corrosion consultancy for in depth understanding and awareness to corrosion.
- Procedural and rust-prevention recommendations.
- Assets Preservation on FPSO , Semi-sub, Jack-up, Tankers, OSV, Mooring Systems, Pipelines and Subsea Equipment.
- Preservation works during Construction, Commissioning, Operations, Warm & Smart Layup phase.
- VCI technology protects from Corrosion for longevity of Assets.
- Assets Preservation conducted on Pipelines System, Derrick, Deck Floors, Electrical Box, Accommodation Rooms, Engine Rooms, Risers, Tanks and Critical components.
- Special Internal Coating for pipelines and coating repairs.

Asset Integrity Management

- Mini ROV with UT probe for inspection applied to hull.
- Mini ROV for full visual inspection record.
- Rope Access work performing various NDT and Mechanical works.
- Advanced NDT utilizing latest method Magnetic Metal Memory for structural, weldment, insulated pipe and CUI.
- Load Testing of cranes and pad-eyes.
- Electrical & Installation during construction and commissioning phase.

Other Services

- Machining part for Oil & Gas Equipment.

Onshore Facilities

- Onshore oil & gas production plants including storage facilities
- Gas treatment plants
- LNG export or receiving facilities
- Refineries
- Onshore oil & gas pipelines systems
- Petrochemical complexes
- Distribution infrastructures

Preservation of Fin fan Blades

Preservation of Internal Piping

MMM Method on Production Pipeline

Before Cleaning

After Cleaning

Technical Services and Expertise

Corrosion Assessment

- Corrosion consultancy for in depth understanding and awareness to corrosion.
- Procedural and rust-prevention recommendations.
- Assets Preservation on Production Plant, Gas Treatment Plants, Above Storage Tanks, Refineries, Pipelines Systems, Petrochemicals and Distribution Infrastructures.
- Preservation works during Construction, Commissioning, and Operations phase.
- VCI technology protects from Corrosion for longevity of Assets.
- Assets Preservation conducted on Pipelines System, Valves, Heat Exchangers, Boiler, Cooling Water Towers, Tanks, Cranes and Facilities Rooms.
- Special Internal Coating for pipelines and coating repairs.

Asset Integrity Management

- Rope Access work performing various NDT and Mechanical works.
- Advanced NDT utilizing latest method Magnetic Metal Memory for structural, weldment, insulated pipe and CUI.
- Load Testing of cranes.
- Quality Management through manpower supplies.
- Third party representatives and vendors evaluation services.
- Electrical & Installation during construction and commissioning phase.

Other Services

- Machining part for Oil & Gas Equipment.

INDUSTRIES SERVE

- Oil & Gas
- Mining Industries
- Manufacturing
- Process Industries
- Aviation Industries
- Building
- Military
- Package Industries
- Marine
