OCEANICS
ENGINEERING SERVICES

Quality Assurance Services

Oceanics perform all forms for quality control, NDT inspection and surveillance. We are mainly targeted towards oil and gas related development projects, petrochemical plants and offshore work.

Our Quality Assurance Services includes the following works:

- ▶ Quality system and procedures
- ▶ Welding procedure specification and qualification
- ▶ Quality control inspections at project sites and vendor locations
- ▶ Quality audits at project sites and vendor locations
- ▶ Review and approval of final documentation
- ▶ Provision of QA/QC resources

Quality Assurance Services starts with Oceanics
